

HILITE[®]
INTERNATIONAL CZECH

HSE Policy (Work Safety, Environmental Protection and Energy Management)

**Principles of Hilite Czech s.r.o.
Location Ostrava**

Innovative Products

Our products help minimize pollution and significantly save energy. In addition to innovative and systematic development provided by the parent company, energy-saving, safe and environmentally friendly production processes and systems are used to manufacture our products, if it is technically and economically feasible.

Protection of the Environment, Work Environment / Improvement of Energy Efficiency is the Task of Management.

We ensure that environmental protection, work environment protection, reduced energy consumption and optimized energy efficiency are taken into account in all functions and at all levels of the business. Compliance with all binding obligations and requirements of interested parties is the basis.

Continuous performance improvement

Our common goal is the continuous improvement of the existing management system, all internal processes and energy efficiency, and thus the further development of the protection of the living and working environment and energy savings in the company. Eliminating hazards and reducing risk is our priority.

Prevention of Impact on the Environment.

Before introducing new products and processes, we evaluate their impact on the living, working environment and energy efficiency. We consider the entire life cycle of our products, including their disposal.

Careful Use of Natural Resources

We use natural resources as sparingly as possible. Energy, water, raw materials and auxiliary materials are used purposefully and efficiently.

Prevention of waste and emissions

Residual and non-conforming materials from production are recycled or disposed of without endangering people or the environment.

Preventive Protection of the Environment, Working Environment and Energy Management

Our priority is to take preventive measures to save energy, protect the environment, the working environment and raise the awareness of our employees through training and information.

Cooperation with Suppliers and other interested Parties.

We work with suppliers to implement our HSE Policy. All other stakeholders are considered in our processes.

V Ostravě, 26. 1. 2023
